

moving Bangladesh forward together

powering economic growth in Bangladesh for over 25 years

we produce over

50% **80%**

of Country's gas demand domestic condensate

Since 2016, we have produced an average of

~1.5 bcfd

to supply clean energy to Bangladesh

more than

95%

of our employees are Bangladeshi nationals

our employees worked more than

50 million work hours*

without a day away from work

we have invested around

\$550 million

in contracts with local suppliers and contractors in the last 12 years

we spent more than

\$15 million

on community programs over last 12 years, benefitting more than **120,000** people

our workforce drove over

38 million km*

safely – equivalent to circling earth more than 500 times

we have created **thousands**

of opportunities for employment including many advanced technical jobs

We have awarded around

9,000 scholarships

to local students in the last 12 years.

- Since entering Bangladesh, has become the country's **largest producer of natural gas** and condensate and a key partner in helping meet Bangladesh's energy demand

- Operates three fields, including Bangladesh's largest producing gas field, accounting for **over 50% of Country's natural gas demand and over 80% of condensate production** in the country

- Deploys leading technical know-how and capability in an **efficient and cost-effective** way

- Projects with over **\$3.6 billion** of Foreign Direct Investment, including **around \$550 million in contracts with local suppliers and contractors** in the last 12 years

- Achieved a **remarkable safety record** while maintaining **world class production efficiency** and focusing on **developing highly skilled Bangladeshi nationals**

- Works with local communities, **building long-term partnerships** that foster economic development and lasting benefits

- Pursuing projects to harness the country's natural resources and provide solutions to **meet Bangladesh's future energy needs**

1995
Two PSCs signed with the Government of Bangladesh (Blocks 12, 13 & 14)

1999
First production at Jalalabad (Block 13)

2005
First production at Moulavi Bazar (Block 14)

2007
First production at Bibiyana, now largest producing gas field in Bangladesh

2012
Commissioning of Muchai Compressor Station to increase capacity of north-south pipeline

2014
Bibiyana Expansion: added development wells and two gas processing trains, increasing production by 300 million cubic feet in 2015

2015
Jalalabad new wells production four new wells.

2022
Extension of PSC Production Period for Jalalabad (Block 13) and Moulavi Bazar (Block 14) to enable continued production

2022
Signing Ceremony of Supplemental Agreement to the Block 12 Production Sharing Contract

* As of December 2022

we define energy in human terms

chevron's global operations

Chevron is one of the world's leading integrated energy companies. Chevron is a global energy company that operates in over 180 countries.

the future of energy

We are focused on lowering the carbon intensity in our operations and seeking to grow lower carbon businesses along with our oil, products, and natural gas business lines.

- From 2021 to 2028, Chevron's planned total capital investment is \$2 billion in carbon-reduction projects and \$8 billion in low-carbon investments.
- We aspire to achieve net zero Upstream emissions (Scope 1 and 2) by 2050 and 35% reduction in Upstream CO2 intensity by 2028.
- Our new Portfolio Carbon Intensity (PCI) target for 2028 sets more than a 5% reduction from 2016.

the chevron way

Our success is driven by our diverse, and highly skilled global workforce united by The Chevron Way, our enduring statement of culture.

- We were listed in Forbes 2022 World's Best Employers.
- We contribute to the communities where we work and live by creating jobs, developing, and sourcing from local suppliers, and giving back in the form of social investment partnerships and programs.
